

livarp ?

livarp est une distribution basée sur DEBIAN WHEEZY.

Site officiel: <http://arpinux.org/livarp/>

livarp tente de tirer le meilleur parti des applications GNU/Linux Debian disponibles afin de proposer un livecd/installable qui puisse tourner sur une très petite configuration matérielle sans rien sacrifier à l'accessibilité et au design.

une attention toute particulière a été portée sur la documentation et l'aide afin de vous faire découvrir plus facilement ces 12 gestionnaires de fenêtres. envie de plus ? visitez la section modules.

livarp se contente d'un processeur PIV et de 256M de ram mais est complètement à l'aise avec 512M de ram. au-delà, c'est du bonus :).
